

I do not support NAB petition 04-160. I have made a choice to subscribe to XM satellite radio and pay for my choice of doing so. I was tired of listening to every radio station in my area owned by the same two companies with them having absolute power over what I heard and when I heard it.

Satellite radio provides traffic and weather reports for limited areas. I can check the weather and traffic online without guilt from NAB. Or is that next.

The first amendment is a powerful right. Please do not silence satellite radio and their ability to broadcast traffic and weather reports.
